G-FORCE Effects on Humans

G-FORCE EFFECTS:

The Effects of G-force on Humans

G-Force

To understand the effects of the term G-force, you must first know what it is. The "G" in G-force stands for gravity of course. But the force has a different definition; it is not the gravity, its acceleration. The general meaning that we usually think of is the increase of speed, but that is not the case in a scientific perspective. Acceleration is the change in speed or velocity. So in your daily life, braking a car or turning around a bend is in fact acceleration according to science

Without a doubt, we experience gravity and the g-force everyday. If there was no gravity, we wouldn't be standing here, and this article wouldn't be written. If someone weighs 80kg, under an influence of 1g, you would still weigh 80kg. Now, we in our course of our lives should have experience g-forces higher than that, whether it is in a car, while it is braking, turning or accelerating, or on a rollercoaster, which you would experience Gs of over 2. At 3g, on some rollercoaster's, a person weighing 80kg, would be 240kg for several seconds. If you have ever experienced a car crash the g-forces could reach up to 12 g for a few seconds. Pilots in F-16s or similar aircraft would have to endure 9gs for maybe ten to twenty seconds.

With 9gs, you'd weigh 720kg if you were 80kg in 1g.

Before you pilot the fighters, you must prove yourself worthy. In order to prove that you could withstand such a tremendous g-force, you will endure yourself through a centrifuge. A centrifuge is basically a spin dryer, but instead of drying clothes, it makes you feel bad. The harder it spins, the more you will get pushed back into your seat.

These forces are bound to screw up the human body.

Firstly, you would feel difficulty breathing. This is due to the reason that the forces will pull down on your

rib cage which in turn pushes down on your lungs,
sometimes emptying the air.

Islam tell us the following

Al-An'am | 165 verses | The CATTLE | Sura# 6 | Makkah
BY THE NAME OF GOD MOST GRACIOUS MOST MERCIFUL

125. Whomsoever Allah desires to guide, he expands his chest to Islam (submission). Whosoever He desires to lead astray, he makes his chest narrow, tight, as though he were climbing to heaven. As such Allah lays scourge on the unbelievers.
